

Objective: This exercise will demonstrate how to format the chart axes and display labels

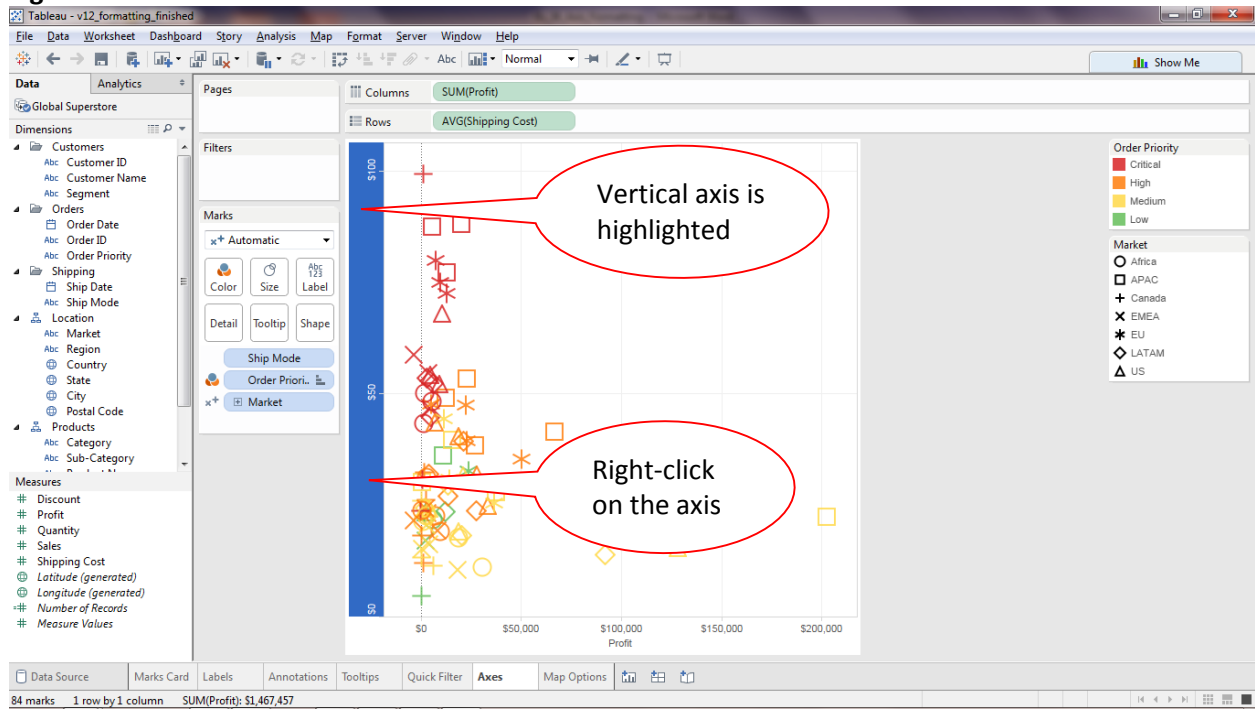

Figure 1 displays the plot of the sum of profits versus the average shipping cost.

Figure 1

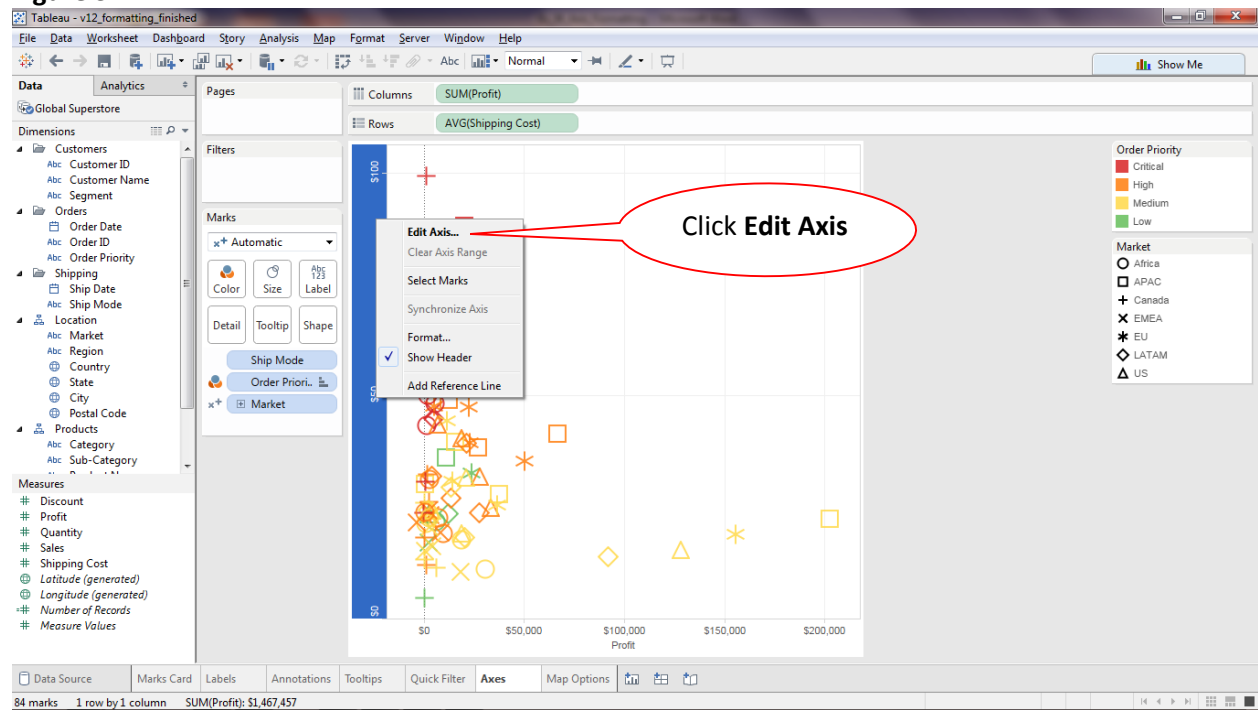

- Click on the vertical axis as shown on Figure 1, which will lead to the display on Figure 2, where the axis is highlighted

Figure 2

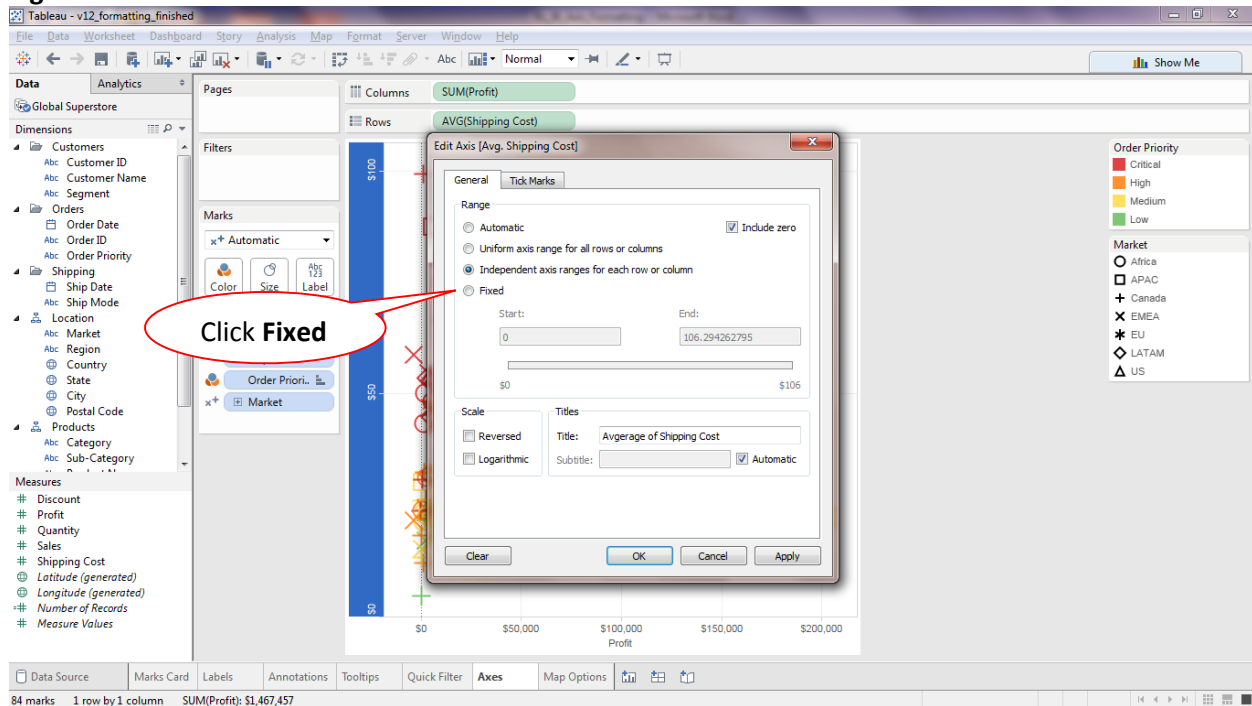

- Right-click on the axis as shown on Figure 2, which will popup the menu tree displayed on Figure 3

Figure 3

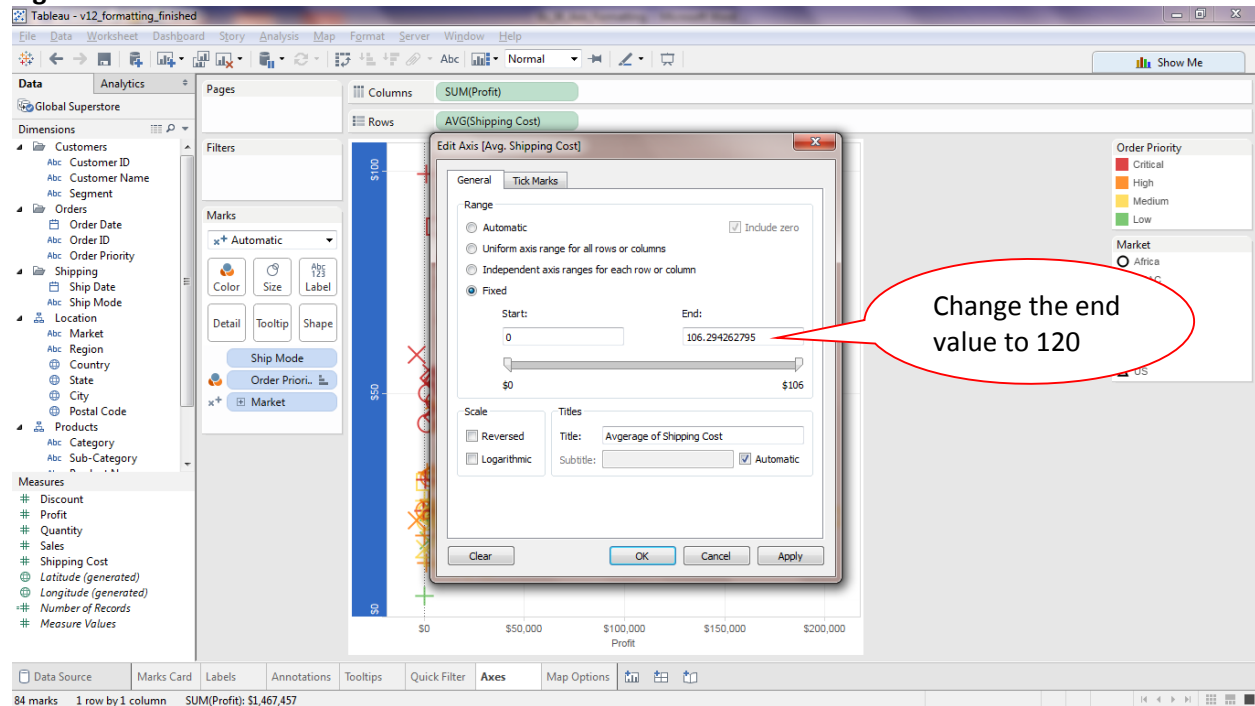

- Click **Edit Axis** as shown on Figure 3, which will popup the **Edit Axis (Avg. Shipping Cost)** window displayed on Figure 4

Figure 4

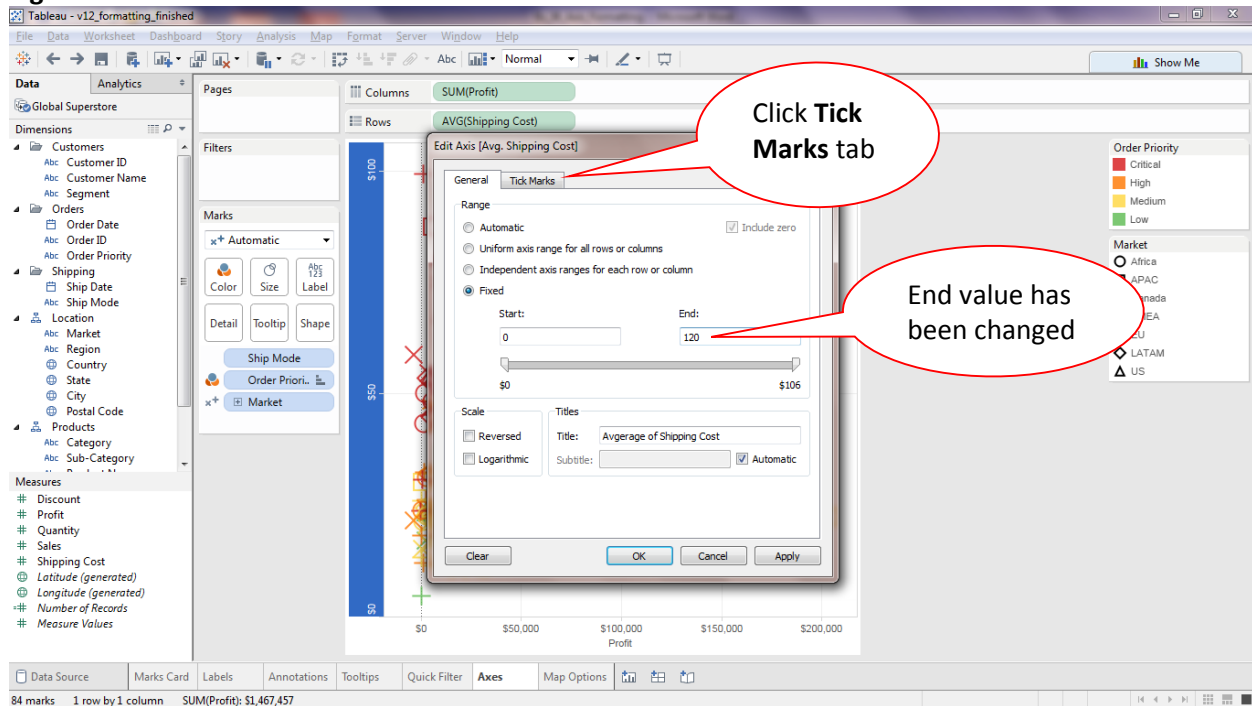

- Click the **Fixed** radio button as shown on Figure 4, which will lead to the display on Figure 5

Figure 5

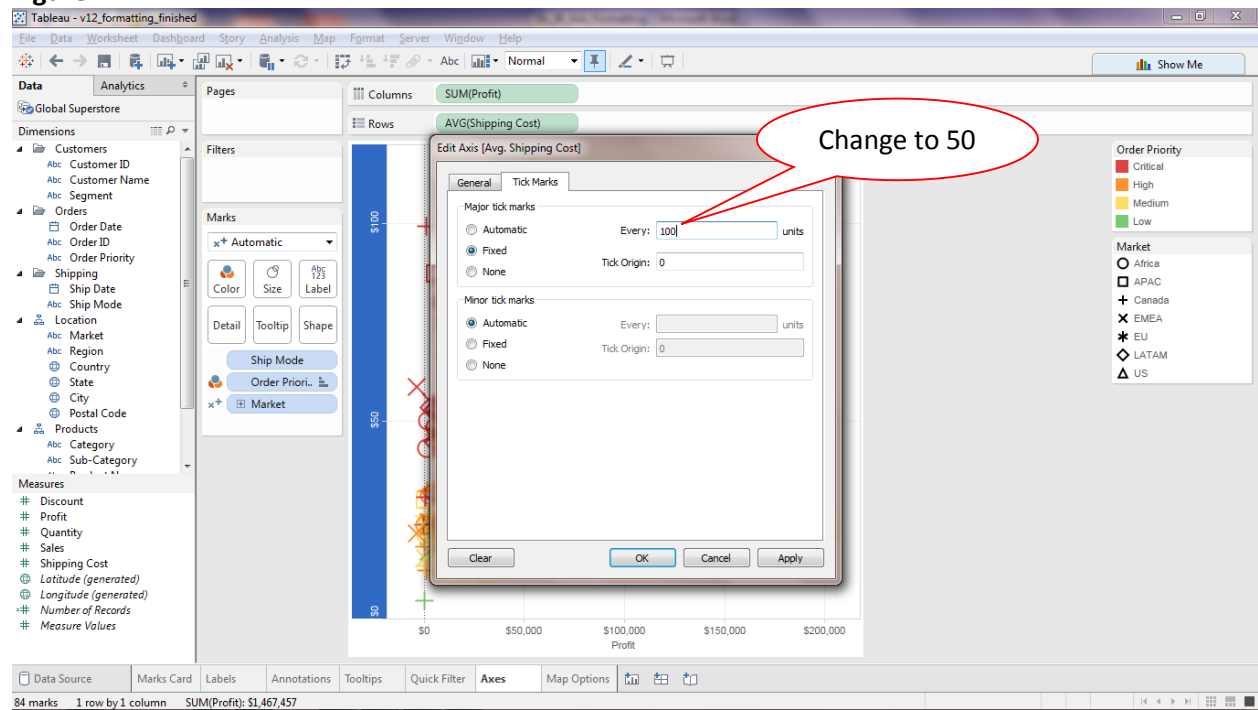

- Change the end value for the range to 120 as shown on Figure 5, which will lead to the display on Figure 6

Figure 6

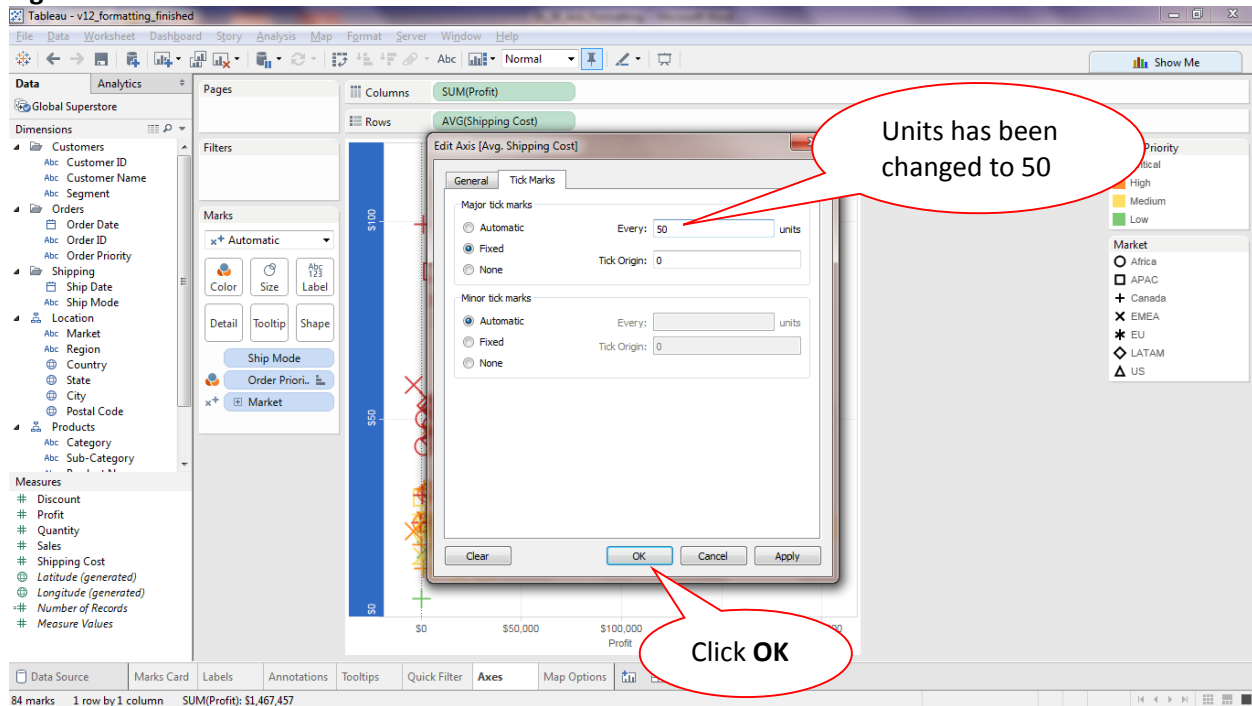

- Click the **Tick Marks** tab as shown on Figure 6, which will lead to the display on Figure 7

Figure 7

- Change the **Major tick marks** units from 100 to 50 as shown on Figure 7, which will lead to the display on Figure 8

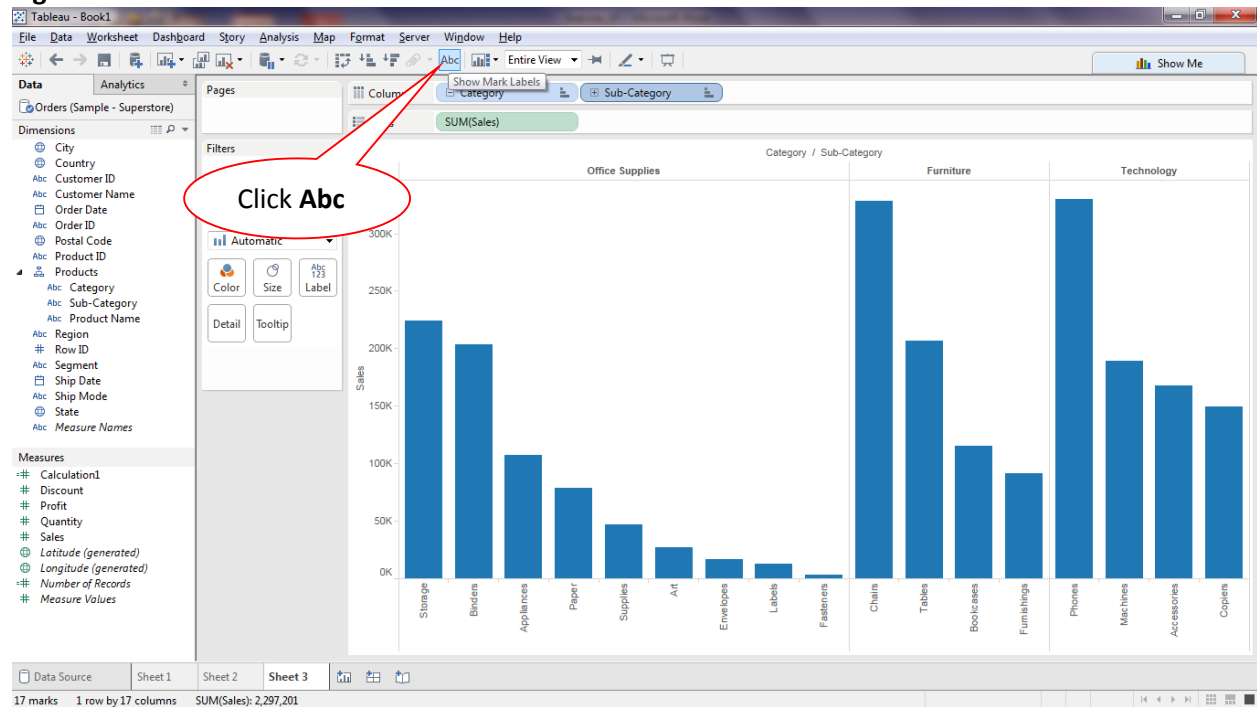

Figure 8

- Click **OK** as shown on Figure 8, which will implement the changes that were made

The next part of this exercise demonstrates how to display the values/labels. We will start with Figure 9 which displays a visualization where the numeric values for the individual bars are not displayed.

Figure 9

To view the values for the bars:

- Click the **ABC** icon on the Toolbar as shown on Figure 9, which will lead to the display on Figure 10

Figure 10
