Objective: This exercise will demonstrate how to format a table

Figure 1 displays a table on which some basic formatting operations will be performed.

Figure 1

 Right-click on the table displayed on Figure 1, which will popup the menu tree displayed on Figure 2 Figure 2

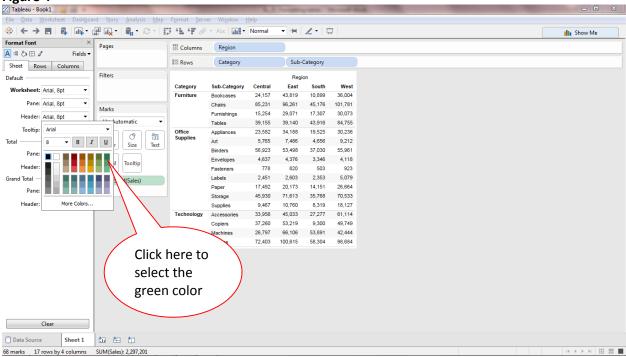

• Click **Format** as shown on Figure 2, which will popup the **Format Font** window displayed on the left-hand side of Figure 3

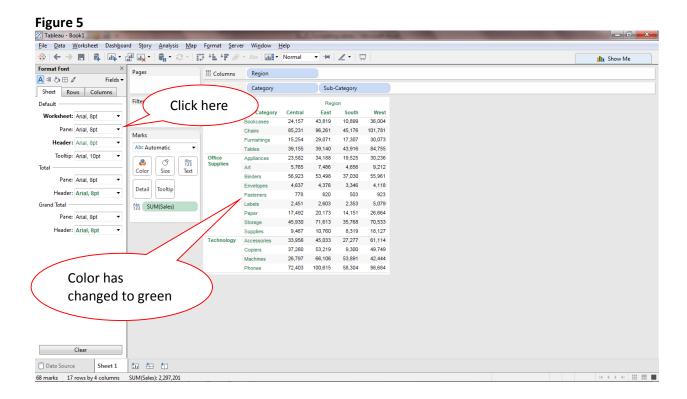

Figure 3

 Click the Header pulldown arrow in the Format Font window as shown on Figure 3, which will popup the window displayed on Figure 4 Figure 4

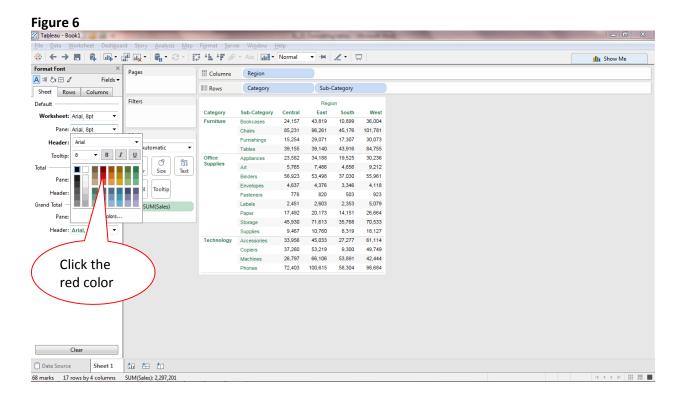

• Click the green color as shown on Figure 4, which will lead to the display on Figure 5 (where the color of the headers has changed to green)

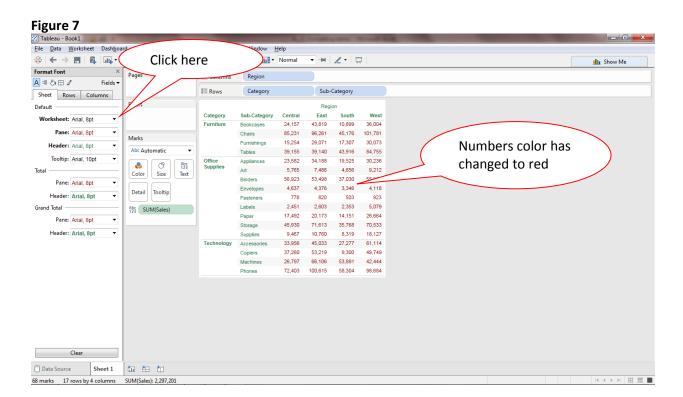

To change the color of the numeric values displayed in the table:

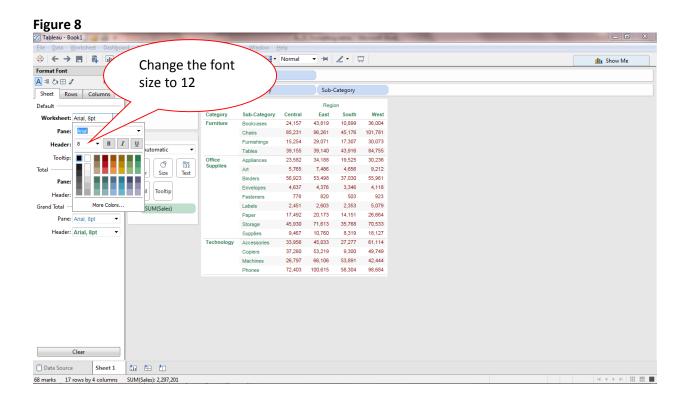

• Click the pulldown arrow for **Pane** in the **Format Font** window as shown on Figure 5, which will popup the window displayed on Figure 6

• Click the red color as shown on Figure 6, which will lead to the display on Figure 7 (where the table data has turned red)

• Click the pulldown arrow for **Worksheet** in the **Format Font** window as shown on Figure 7, which will popup the window displayed on Figure 8

• Change the font size to 12 (from the default size 8) as shown on Figure 8, which will lead to Figure 9 where the numbers displayed in the table are bigger (size 12)

Figure 9
